Basic Usage

Accessing Props

Setup Context

Usage with Render Functions

Reactivity: Core

ref()

computed()

reactive()

readonly()

watchEffect()

watchPostEffect()

watchSyncEffect()

watch()

Reactivity: Utilities

isRef()

unref()

toRef()

toValue()

toRefs()

isProxy()

isReactive()

isReadonly()

Reactivity: Advanced

shallowRef()

triggerRef()

customRef()

shallowReactive()

shallowReadonly()

toRaw()

markRaw()

effectScope()

getCurrentScope()

onScopeDispose()

Lifecycle Hooks

onMounted()

onUpdated()

onUnmounted()

onBeforeMount()

onBeforeUpdate()

onBeforeUnmount()

onErrorCaptured()

onRenderTracked()

onRenderTriggered()

onActivated()

onDeactivated()

onServerPrefetch()

Dependency Injection

provide()

inject()
